

## Mobility

With Cox Business VoiceManager®, we provide you mobility like never before. Whether you're on your commute to work, to a client, to another city—you stay connected. Can't work from the office? Our features allow *you* to decide how, when, and where you want to be contacted. The calls you place have the same calling appearance as your office phone and are billed directly to the company.

And what about that call or meeting that you absolutely cannot miss? VoiceManager can provide special routing and notification options that can make being across the country, more like being just across the hall.

### Maintain Communications While Away from the Office

Feature	Capability
<b>Call Forwarding /Remote Office</b>	Answer calls directly from a different phone regardless of your location.
<b>Toolbar / Personal Call Manager</b>	Manage call handling the same way as if you are in the office. All Call Hold, Conferencing, Call Transfer, Music On Hold, and abbreviated dialing features are fully operational. Initiate outbound calls from any location that will be billed to the company. All calls made will use the office caller ID, giving the appearance that you are placing the call from your office.
<b>Simultaneous Ring</b>	Enable calls to ring different numbers, such as your home or cell phone simultaneously to increase the chance of reaching you.
<b>Sequential Ring</b>	Provide a “find me – follow me” capability so calls ring in sequence to pre-defined additional phone numbers to increase the chance of reaching you.
<b>Selective Acceptance / Call Forwarding Selective</b>	Determine specific calls you want to receive and answer while away from the office. Telephone number and time of day call routing options enable you to manage specific calls while you are on the road.
<b>Call Notify</b>	Provide a special email alert when a specific caller tries to reach you. Ensure shorter response times on your most critical calls.
<b>United Messaging</b>	Reduce the time to review email and voice mail messages by having all of them in a single interface. Prioritize the order of responding to messages while you are away.
