

Cox Business Bulk HD Select for Hospitality

Cox Business Bulk HD Select solution offers a scalable option to allow you to provide your guests, visitors, employees or other end users with a homelike viewing experience. Bulk HD Select provides 100% digital picture and sound quality, access to Cox's full lineup of HD channels, an interactive program guide that includes your logo and background preferences, and on-screen user controls and settings.

Unobtrusive In-Room Equipment

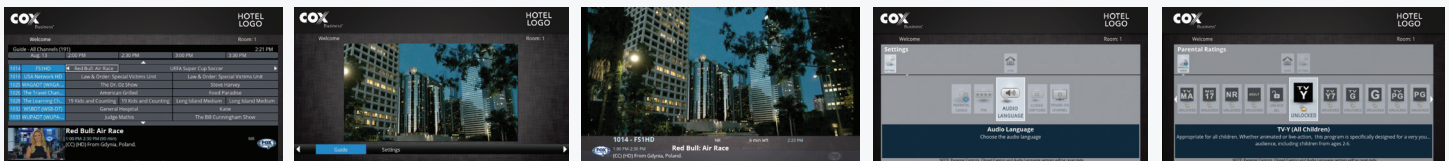

Our low-profile setback equipment is designed to attach directly to any flat-screen TV, but will work with any model with an HDMI port. You receive digital/HD insertion equipment for property insertions and analog regeneration equipment for specialty TV outlets, if required. We also perform solution testing and can recommend network wiring for your property. The tamper-resistant equipment is hidden, with no distracting lights. It's operated with a user-friendly, antimicrobial remote control to deliver an experience with very little learning curve. Your end users may not notice these special features, but they'll notice the upgraded viewing experience.

Leverage Our Residential Channel Lineup With Commercial-Grade Features

Offer your guests and visitors all the comforts of home, including a selection of TV channels they want to watch with 100% digital picture and sound quality, with most channels available in HD. React to guests' interests by upgrading services and adding previously unavailable channels. And the power-on channel management feature allows you or your end user to set a favorite channel when the TV is powered on.

Our on-screen programming guide is easy to understand, with a clear presentation of the available channels. With the press of a button, end users can quickly find the channels they want to watch, reducing your need to provide any extra printed materials or assistance.

Add Your Brand and Your Own Special Touches

We offer a selection of program guide themes that can be custom-branded with your logo, helping you reinforce your brand. Custom lineups are available for TVs in different areas of your facility. Channel insertion options are also available, so you can add your own custom content and videos.

Boutique

Tools for Your Staff

The included front desk portal gives your staff the ability to quickly check the health of each piece of equipment and manage individual viewing settings on behalf of your guest. This Web-based tool can be leveraged by any member of your team who is tasked with helping end users or maintaining your facility. We also provide high-level training for your property's technical staff.
