</table>

1. Remove the cover-securing screw with a Phillips screwdriver and set it aside.
2. Pry the base from the cover and set it aside.
3. Remove the old battery and dispose of it properly.
4. Insert one new CR2 battery, observing proper polarity.
5. Replace the cover, ensuring the tabs on the cover line up with the slots on the base.
6. Close the sensor and replace the screw.
