Please note: The SBG6580 product label is located on the bottom of your gateway.

You may need the following information to activate your gateway and set up a wireless network connection:

- **Model** - Gateway model number.
- **SSID** - Default name of your wireless network. Recommended that you change the network name or add additional wireless networks.
- **WI-FI SECURITY KEY** - Needed to access a wireless network using a secure gateway. Recommended that you change the network name which is needed to add additional wireless devices to your wireless network.
- **CD ROM PASSCODE** - Associated with the CD-ROM Connection Wizard.
- **S/N** - Gateway serial number. Your service provider may require this number to activate your gateway.
- **HFC MAC ID** - Your service provider may require the Media Access Control (MAC) number to activate your gateway.

Notes

Write your additional wireless network information here for future reference.

SBG6580 Installation CD-ROM

Quick Startup Guide

What You Should Know Before Getting Started

This startup guide will help you install your SBG6580 Gateway and get it to operate on a secure wireless network. There are three **SBG6580 Connection Video Tutorials** available if you need additional help setting up your gateway. You can access the videos online at the Motorola Support website, **www.motorola.com/us/support**, (follow the prompts) or from your mobile device; just text **SBG6580 to 878787** or scan the QR code:

For information on advanced wireless network configurations, see the **SBG6580 User Guide** which is available online at the Motorola Support website.

IMPORTANT! You must have a live broadband cable connection installed before starting your gateway installation. If you do not, please contact a service provider for assistance.

When contacting your service provider, you may be asked for the **HFC MAC ID**, **Serial number**, and **Model number** of your gateway. This information is available on the product label located on the bottom of the gateway and also on page 4 of this guide.

Please visit **www.motorola.com/us/support** for FAQs and additional product documentation.

BEFORE RETURNING THIS PRODUCT TO THE STORE for any reason, call Motorola Broadband Technical Support: 1-877-466-8646

Connecting Your Gateway

Before starting, make sure your computer is powered OFF.

Note: You may need additional items not included with your gateway (such as a coaxial cable or RF splitter) to complete your gateway installation.

1 Connect the coaxial cable to a cable wall outlet (or cable splitter) and your gateway. Hand-tighten each connector.

2 Plug the power cord into your gateway and an electrical outlet. This will power ON your gateway.

3 Connect the Ethernet cable to any Ethernet port on your gateway and then connect the other end to the Ethernet port on your computer.

Front Panel LEDs

During startup, the front panel LEDs will light up in sequential order to indicate the registration process. LEDs will flash during registration. If an LED did not light up, contact your service provider for assistance.

Connecting Your Gateway

Before starting, make sure your computer is powered OFF.

Note: You may need additional items not included with your gateway (such as a coaxial cable or RF splitter) to complete your gateway installation.

1 Connect the coaxial cable to a cable wall outlet (or cable splitter) and your gateway. Hand-tighten each connector.

2 Plug the power cord into your gateway and an electrical outlet. This will power ON your gateway.

3 Connect the Ethernet cable to any Ethernet port on your gateway and then connect the other end to the Ethernet port on your computer.

Setting Up a Wireless Network Connection

Note: Before setting up a wireless network connection, your gateway and computer must have access to a broadband or high-speed Internet service.

To configure your wireless network name (SSID) and security settings, and other network parameters, you must access the gateway configuration URL: type **192.168.0.1** in your browser window. See the **SBG6580 User Guide** for more information.

Choose **one** of the following options to set up your wireless network connection. When done, continue with "Testing Your Wireless Network Connection."

A Changing Your Computer Wireless Network Options

Note: The steps for setting up a wireless network may differ slightly depending on the operating system installed on your computer. The following steps apply for Windows® XP.

1. From Windows taskbar, click **Start, Control Panel, Network and Internet Connections, Network Connections, Wireless Network Connection** to open Wireless Network Connection window.

2. Scroll down and select the SBG6580 wireless network name (SSID) on the SBG6580 product label). Click the MOTOROLA wireless network name and then click **Connect**.

3. Enter **Network key** code in the Network key & Confirm network key fields (listed as **Wi-Fi Security Key** on the SBG6580 product label).

4. Click **Connect** to complete the wireless network connection. **Connected** status should display.

5. Close Wireless Network Connection window.

Testing Your Gateway Connections

1. Power ON your computer and log in. During the initial startup, the gateway LEDs are lit SOLID.

2. Contact your service provider to activate (provision) your gateway.

Note: Your service provider may allow for automatic activation which will automatically launch a special website when you open a web browser. If so, continue with step 3.

3. To test your gateway connection, open a web browser on your computer, such as Internet Explorer, Firefox, Google Chrome, or Safari. Type a valid URL (**www.motorola.com**) in the address bar and then click or press **Enter**. If the web page did not open, please contact your service provider for assistance.

Front Panel LEDs

During startup, the front panel LEDs will light up in sequential order to indicate the registration process. LEDs will flash during registration. If an LED did not light up, contact your service provider for assistance.

Testing Your Wireless Network Connection

3. Press the **WPS** button on your WPS-enabled computer or other device. Repeat for each additional wireless device.

2. Press the **WPS** button on the SBG6580 front panel.

1. Power ON your gateway and other WPS-enabled devices that you want to connect to the wireless network.

This option will automatically configure the SSID wireless network name and Wi-Fi Security Key to connect your gateway and other WPS-enabled devices to a wireless network.

To use WPS, your computer hardware must support WPS and have WPA security compatibility.

C Using the WPS Pairing Button

5. Upon completion, click **Finish** to exit the wizard.

4. Select **Launch Wi-Fi Assistant** and follow the prompts to set up your wireless connection.

3. Locate **CD ROM Passcode** on gateway product label, then click **Next**.

2. Follow the prompts to accept the License Agreement.

1. Insert SBG6580 Installation Assistant CD into CD-ROM drive.

B Running the SBG6580 Installation Wizard

2. Open a web browser on your computer.

3. Type a valid URL (for example, **www.motorola.com/us**) in the address bar, and then click or press **Enter**.

If the web page did not open, please contact your service provider for assistance.
