Installation

DOCSIS 3.0 AC1900 Wireless Data Gateway C6300BD

NETGEAR[®]

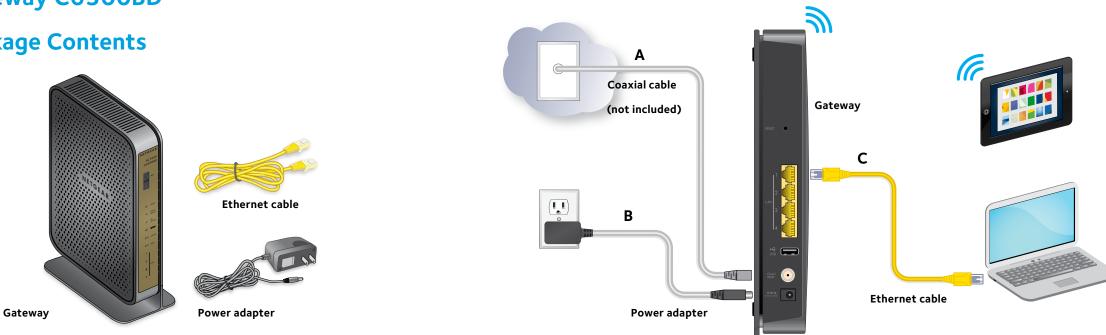

1. Connect a coaxial cable.

Use a coaxial cable that is provided by your cable company to connect the cable port on the gateway to a cable wall outlet or a line splitter (A).

2. Connect the power adapter.

Connect the power adapter to the gateway and plug the power adapter into an electrical outlet (B).

The Power LED 🕑 lights green.

Package Contents

3. Connect a computer to the gateway.

Use an Ethernet cable to connect a computer to the Ethernet port on the gateway (C).

You can also connect with WiFi. Use the WiFi network name and password on the product label.

4. Log in to the gateway.

Launch a web browser. The gateway menu displays.

If you do not see the gateway menu, enter **http://routerlogin.net** or http://192.168.0.1 in the address field of the web browser.

When prompted, enter **admin** for the user name and **password** for the password.

5. Get the genie app.

Download the free genie app from www.NETGEAR.com/genie.

Easily share media and files on the network from your smartphone, tablet, or laptop.

You can use the buttons and LEDs on the front of the gateway to check its status.

Button	Description
WPS	Pressing this button opens a two-minute window for the gateway to connect with other WPS-enabled devices. The LED blinks green for the length of time the window is open.
WiFi ((+))	The WiFi button is disabled.
